### Connecticut Launcher Station Relocation

**CLIENT REFERENCE:** North Star Industries of Massachusetts. Contact information given upon request

**PURPOSE** Complete the removal and relocation of a Launcher Station on the Algonquin Natural Gas Line in Conn.

#### SOLUTIONS:

The removal of the existing Launcher Stations for the 10 inch and 16 inch Algonquin gas lines, then reconnecting the existing pipelines was completed in the first phase. During the winter months the valves of the launcher's were completely refurbished and the following Spring **CCB** was required to return and build a new launcher station which also required an elevation change of 16 feet.

Site work included Access road improvement and relocation, site grading and fencing. The navigation of wetlands and prevention of damage to turtle habitat at the new location was also required.

#### CHALLENGE:

Decommission and relocate the existing launchers systems for the 10 and 16 inch pipes in the Algonquin Pipeline System.
